Action Alert

There appears to be some movement on the tax package that would help WV businesses.

SB 749, which will combine reporting of subsidiaries, is now moving. This legislation is aimed at leveling the playing field especially for small businesses that can not transfer or shelter income. This bill has now been amended to cut the business franchise tax down to .20% by 2012.

Please contact your legislators, especially your senators, today in support of this legislation.
